### OUR DEVELOPMENT PROCESS

#### ■ REQUIREMENTS ANALYSIS \ DISCOVERY \ CONCEPT

Our Software analytic experts will work with you collecting information to define and perfecting your idea.

#### ■ STATEMENT OF WORK

Knowing all your requirements WES will prepare a SOW document defining project tasks to be accomplished and \ or the services to be delivered

#### ■ PROTOTYPE & DESIGN

After scoping the requirements with you, WES assign a software designer to create a unfinished version of the final product to obtain value feedbacks from the users early at the project.

#### ■ DEVELOPMENT

Using agile methodology and proprietary methodologies , WES team build a solution that will meets all your requirements.

#### ■ TESTING

After coding and development, the testing phase verify the deliverable of the implementation. The goal at this level is to evaluate whether the system has complied with all of the outlined requirements and to see that it meets Quality Standards.

#### ■ MAINTENANCE AND SUPPORT

Maintenance and Support plays a complementary role to software development. We provide you with a 12 months of free support, whether it is a maintenance or product support our team will be an efficient resource to help you maximize the return on investment and improve your business process.
